

PUBLIC HEALTH EMERGENCY RESPONSE

CAPABILITIES BRIEF

Eagle Health Analytics, LLC (EHA) is a certified 8(a) Alaska Native Corporation (ANC) that contracts with federal agencies and military partners through both the direct award and competitive procurement processes. We provide support for Public Health Emergency Response both domestically and internationally through personnel deployments and remote work. EHA offers comprehensive public health emergency communication, epidemiology, data science, and diagnostic services for infectious diseases and other public health threats to all countries including West Africa, Puerto Rico, and most recently on a global scale in response to SARS-CoV-2. EHA experts are actively working with the CDC's Emergency Operations Center (EOC) and the Joint Information Center (JIC) to reduce the impact of coronavirus disease 19 (COVID-19).

As a small business, EHA is singularly qualified to support federal programs in spheres where previously only large companies have been players. Our 8(a) status allows EHA to accept direct awards (sole-source contracts) up to \$22 million. Awards to an 8(a) ANC cannot be protested.

RAPID, GLOBAL RESPONSES

EHA has provided support to international public health emergencies since 2010. Our first deployment as a single implementor for PEPFAR resulted in EHA's presence in every PEPFAR country; this service continues in 2021. As a direct result of our efforts to support to mission against HIV/AIDS, millions of lives have been saved across the globe.

EHA was selected by CDC leadership to internationally deploy public health professionals for the Zika response in Colombia, Puerto Rico, and Brazil. Our support for Zika EOC and Pregnancy and Birth Defects Task Force (PBD) includes technical support, surveillance, epidemiology, data management, laboratory/diagnostic, communications, bio-statistical expertise, and clinical care.

We support the global effort to address SARS-CoV-2 and reduce the morbidity and mortality of COVID-19. Media consultants staff the JIC and consult on strategy and content. Our data scientists support the mission on site and through deployments. EHA actively assists the global public health community with pandemic response.

TRACKING & CONTAINING PANDEMICS

EHA supports the Division of Global Migration and Quarantine (DGMQ) to prevent infectious diseases and other diseases of public health significance from entering and disseminating in the United States. To accomplish this goal, EHA provides a large staff of public health professionals focused on developing infectious disease surveillance systems for immigrant, refugee, and displaced persons entering the United States; conducting disease surveillance and outbreak investigations; providing leadership and technical assistance in response to outbreaks; disseminating health information to state and local public health partners; and overseeing the Migrant Serum Bank.

PARTNERS

- Centers for Disease Control and Prevention (CDC)
- Division of Global Migration and Quarantine (DGMQ)
- Joint Information Center (JIC)
- Emergency Operations Center (EOC)
- Pregnancy and Birth Defects Task Force (PBD)
- Overdose Data to Action (OD2A)
- Puerto Rico Department of Health (PRDH)
- Migrant Serum Bank
- Water, Sanitation and Hygiene (WaSH)
